

THE GREAT MINDS

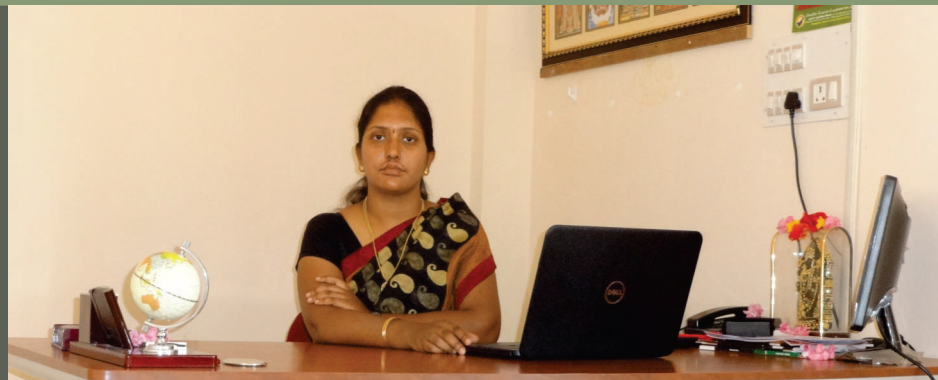

A UNIQUE SCHOOL

Our Motto

“You may be a bush in the valley but remember, you have to be the best bush in the whole valley”

We in “The Great Minds” follow this as our guideline. We would like to develop an “open door” policy which actively encourages the communication between school and home. With your help we can nurture your child into a beautiful, caring and successful human being full of life and gratitude.

The Great Minds

Dolls and Balls Room

We have a room of indoor play equipments which includes a ball pit, an elephant slide, riders etc to teach the children the concept of colours, shapes and also to appreciate the company of a group of kids.

Library

Our library has a lovely set of books to improve the general knowledge of the children and also to inculcate the habit of reading books among them. These books will answer questions that arise in kids minds in a language that they understand best.

Curriculum

The school follows the guidance from the i-discoveri XSEED program which aims at building self confidence, good language skills and self expression in every child. To us every child is Unique.

Trained Faculty Members

Our tutors are well trained and have a rich experience in handling kindergarten students. They will deliver the curriculum with a lot of love and affection and will actively take part in the class along with the children.

We have a good student-staff ratio to see that every child gets individual attention.

Classrooms

Our classrooms are spacious, air conditioned and well furnished. Each classroom is well equipped with standard, non-toxic teaching aids and Montessori materials as we follow the play way method of teaching. We also have projectors to help develop the kid's visual understanding.

Playground & Water Pool

We have an extensive Playground with a lush green garden so that the kids can enjoy a pollution free environment. Our water pool is a lovely place for children to play on a hot summer day. It is situated in the garden so that the kids can learn to appreciate and enjoy nature.

Under Watchful Eyes

The whole campus is under CCTV surveillance and so your kid is always under the watchful eyes of the management whether in the play area or in the class room.

Extra Curricular activities

We provide Yoga classes, Dance classes, Culinary Arts and Art & Craft classes on a regular basis so that children understand the importance of time management and prove their talent in skills other than studies.

We aim at developing self help skills by teaching kids minute day to day activities so that our kids are ready to enter the formal world with bright ideas and self confidence. Their interpersonal skills and vocabulary will be developed in a way that they seem unique in the competitive world ahead of them. Parents get an opportunity to interact with other parents and the management to keep in touch with the different approaches to teaching and parenting. Together we can make better citizens for a better tomorrow. Help us discover the uniqueness in your kid.
